Why Choose Us

FLUTEBYTE TECHNOLOGIES

- Certified & Skilled Experts
- End-to-End Tech Expertise
- Consistent Progress Updates
- On-Demand Feature Enhancements
- Proven Client Outcomes
- Accelerated Time To Market
- IP & Data Protection
- 24/7 Support Availability

Featured Projects

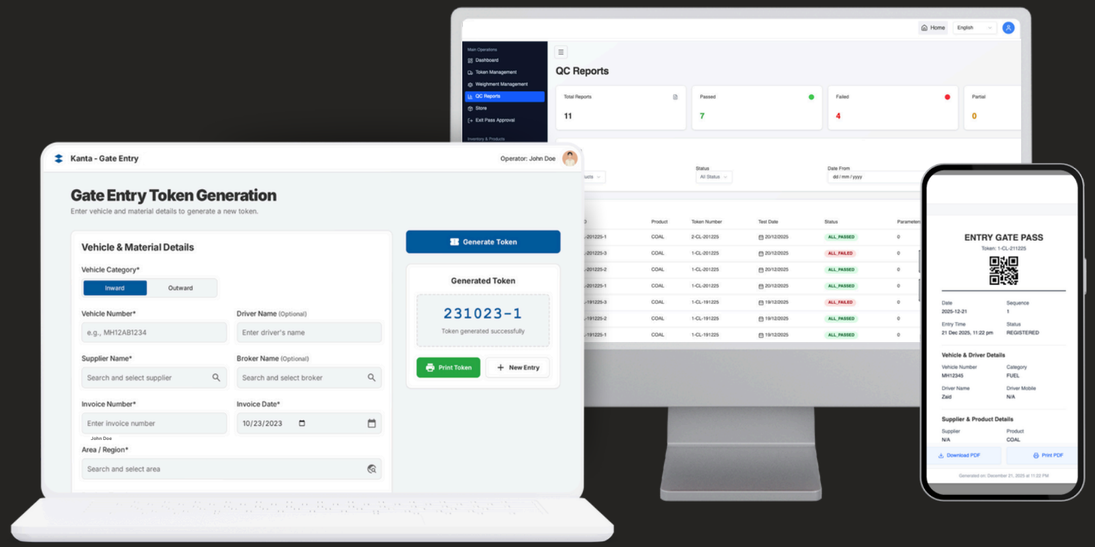
FLUTEBYTE TECHNOLOGIES

Manufacturing Operations ERP

A unified manufacturing ERP digitizing inward operations, quality control, and plant intelligence with real-time visibility and control.

Features

- Token-based vehicle entry and movement tracking
- Gross and tare weight capture with timestamps
- Automated net weight calculation with full traceability
- Digital exit pass approval workflows
- Complete inward lifecycle captured digitally
- Laboratory QC test recording per vehicle and material
- Configurable quality parameters and threshold limits
- Pass / reject status with historical tracking
- Technician-wise QC accountability and logs
- Printable QC reports for audits and compliance
- Live dashboards for weighments, tokens, and QC status
- Daily operational summaries and activity metrics
- Role-based access for Admin, Operations, and QC teams
- Historical data for traceability and performance analysis
- Export-ready reports (Excel / PDF)



Featured Projects

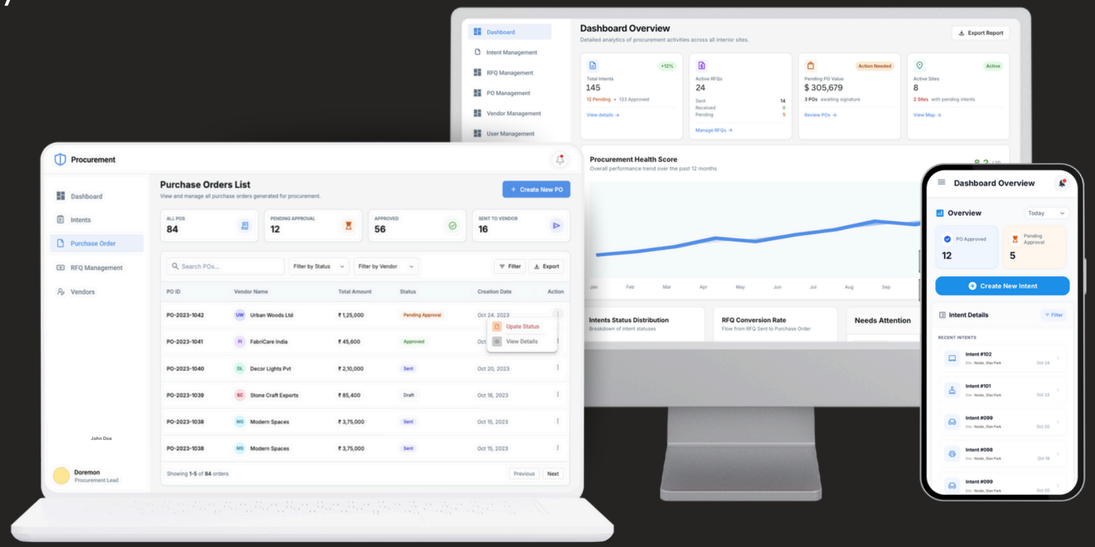
FLUTEBYTE TECHNOLOGIES

Interior Design ERP

A centralized, intelligent ERP platform built exclusively for interior design & turnkey project companies - enabling absolute control over projects, materials, vendors, finances, and site operations in real time.

Features

- Centralized management of multiple interior projects & sites
- Real-time site-wise material consumption tracking
- Structured material intents from site supervisors
- Department-wise visibility (Civil, Carpentry, Electrical, Tiles, etc.)
- Photo-based delivery verification to ensure on-site accountability.
- Complete digital procurement lifecycle from RFQ to PO
- Automated vendor price comparison (L1 / L2 / L3 intelligence)
- Approval-based Purchase Order workflows with audit trail
- Vendor performance tracking across projects & sites
- WhatsApp-enabled RFQs and PO delivery
- Advance, partial & final payment tracking
- Vendor-wise payment history and outstanding analysis
- Site-wise and department-wise cost analytics
- Export-ready reports (Excel / PDF) for management review
- Role-based dashboards for Admin, Accounts & Management



Featured Projects

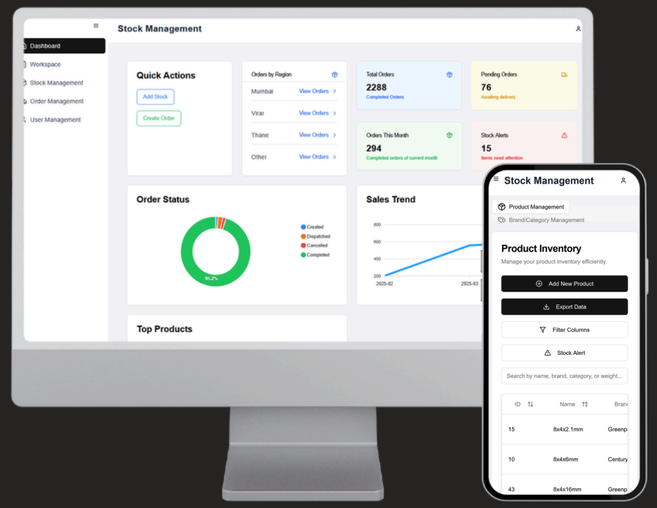
FLUTEBYTE TECHNOLOGIES

Inventory Management

A robust and well-structured system built to streamline stock control, packaging operations, and dispatch workflows. Designed with scalability and performance in mind, it ensures efficient inventory handling across warehouse and logistics environments.

Features

- Real-time tracking of stock across all regions
- Track inbound and outbound goods movement in real time
- Real-time stock level monitoring with alerts and notifications
- Role-based access for warehouse staff and admin-level reporting
- Quick actions to add stock or create orders instantly
- Order management by region
- Live order status tracking (Created, Dispatched, Cancelled, Completed)
- Visual sales and order trend analytics
- Automated packaging-to-dispatch workflow
- Role-based access for staff, managers, and admins
- Monthly order overview with completed count and breakdown



Featured Projects

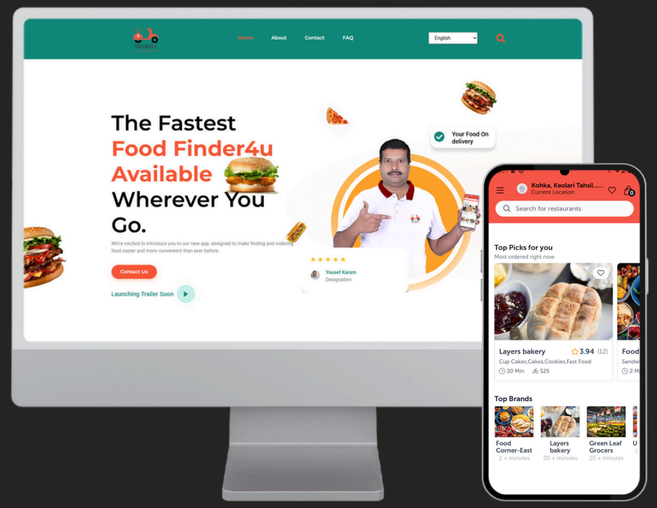
FLUTEBYTE TECHNOLOGIES

Food Delivery App

A scalable and secure application designed for automating packaging, inventory management, and logistics operations in food delivery and warehousing. The platform streamlines end-to-end workflows—from inbound materials to outbound delivery—ensuring speed, accuracy, and efficiency.

Feasibility

- Browse and order from nearby restaurants in real-time
- Live order tracking with delivery partner location updates
- Smart filters for cuisine type, ratings, price range, and delivery time
- Secure checkout with UPI, credit/debit cards, and digital wallets
- Apply promo codes and wallet credits during checkout
- Customer ratings and reviews for restaurants and dishes
- Clean, intuitive UI for fast browsing and ordering
- Separate apps for customers, restaurants, delivery agents, and admin
- Admin dashboard to manage users, orders, restaurants, and commissions
- Restaurant panel to manage menu, orders, and availability
- Delivery app with optimized routing and status updates
- Fast-loading app optimized for low bandwidth regions



Featured Projects

FLUTEBYTE TECHNOLOGIES

Astrology App (Calendar)

A user-focused astrology calendar app designed with scalable, secure, and performance-driven architecture. It offers daily, weekly, and monthly astrological updates, panchang, and event reminders.

Feasibility

- Daily Panchang with Tithi, Nakshatra, and Rashi details
- Monthly Hindu calendar view with festival and vrat highlights
- Zodiac sign-based daily insights and readings
- Collection of Aarti, Katha, and religious content
- Muhurat (auspicious timing) lookup for rituals and events
- Add and manage custom reminders for important dates
- Jyotish and Vastu-related knowledge sections
- Contact Guruji feature for personalized guidance
- Categorized sections for quick access (e.g., Festivals, Aarti, Muhurat)
- Clean, vibrant UI with Hindi content focused on spiritual and cultural needs

Implementation Roadmap

FLUTEBYTE TECHNOLOGIES

Planning & Requirements

01

- Understand client goals
- Gather functional and technical needs
- Identify key features
- Set priorities and timelines

Scope & Design

02

- Create detailed project documentation
- Design user interface and wireframes
- Review user experience (UX)
- Finalize design with client feedback

Development

03

- Develop features milestone-wise
- Follow clean and scalable code practices
- Implement backend and frontend
- Maintain regular code reviews

Testing

04

- Perform unit and integration testing
- Identify and fix bugs
- Check speed and compatibility
- Ensure all features work as expected

Launch & Support

05

- Deploy the final product
- Conduct user acceptance testing (UAT)
- Provide training and documentation
- Offer post-launch updates and support
